SKINS

m2atelier has designed a cabinet with a strong architectural character, custom-designed to accommodate the undercounter wine cellar.

S K I N S

Essential aesthetics meet urban suggestions and vintage references in the sophisticated S K I N S accessory, a precious free-standing storage unit for the undercounter wine cellar.

Essential aesthetics meet urban suggestions and vintage references in the sophisticated S K I N S accessory, a precious free-standing storage unit for the undercounter wine cellar.

S K I N S, like a precious jewellery box, holds the finest wines, perfectly stored in the undercounter wine cellar, along with an upper 'vanity' area for storing glasses, corkscrews and bottle openers, carafes and decanters.

In the S K I N S Club version, the cabinet houses a capacious humidor to store about 120 cigars at the perfect humidity level.

S K I N S is available with catalogue finishes or can be customised, subject to availability and technical verification. Made in Italy, it is a product designed by m2atelier studio.
